

## 2002 World Conference of filePro Developers

fP Technologies, headquartered in Indianapolis Indiana, held the 2002 International Conference of filePro Developers was held in Tampa, FL recently. Developers from the US, Australia, Haiti, Puerto Rico and other countries were present at the Crown Plaza Hotel in Tampa on February 7 - 9<sup>th</sup>.

This brings together a tremendous wealth of products and knowledge from wide variety industries such as transportation, healthcare, insurance, and retail, plus, many product offerings from various government agencies. These applications are also being web enabled to allow easy access to information that the customer needs.

Many of the developers brought with them knowledge and experience in excess of 20 years. Each developer in this distinguished group not only has the knowledge from their own discipline, but has the knowledge base and access to applications from other developers as well.

fP Technologies, Inc. has provided an extensive list of needed tools and support to allow data control for applications on a wide range of platforms such as Unix, Linux, Windows and Sun. fP Technologies has also provided tremendous support for developers in cross marketing of their products providing developers the ability sell and support products from industries other than their own. In many cases, open source code is available, as well, enabling developers to customize applications for individual clients.

With this type of support and enthusiasm, developers in this community have an unprecedented opportunity to provide the best and most comprehensive suite of applications available on the market today. Thanks to this type of close collaboration, companies that purchase these products can expect to have the best support and performance of any products on the market today.

For more information on developers in your area, contact fP Technologies at [www.fpotech.net](http://www.fpotech.net) or at (800) 847-4740.
